

SATENDRA

Sr. Angular Developer | Java Full Stack Developer | Immediate Joiner

Email:-satendracaria@gmail.com | Mobile No:- 9953096599 | GitHub: github.com/satendracoder

LinkedIn: [linkedin.com/in/satendracoder](https://www.linkedin.com/in/satendracoder) | Website: www.satendracoder.com

Professional Summary:

Angular Developer with **3+ years of experience** in building responsive, secure, and scalable web applications using **Angular (HTML5, TypeScript, RxJS, SCSS)**. Skilled in **UI/UX optimization, API integration, and role-based authentication** using **JWT** security. Experienced in **fintech modules** such as **AEPS, Recharge, Micro-ATM, Bill Payments, and HDFC Loan CRM** with reusable component architecture. Additionally, have **11 months of hands-on experience in Java Spring Boot** for developing and automating **REST APIs, data scraping, and export workflows using Selenium WebDriver**. Proficient with **MySQL, Git, GitHub, CI/CD pipelines, PWA, Device SDKs and Postman**. Immediate Joiner.

Technical Skills

- **Front-end:** Angular 14-18, RxJS, HTML5, CSS3, SCSS, JavaScript, TypeScript, Angular Material, Bootstrap, Tailwind
- **Back-end:** Java, Spring Boot (REST APIs, JWT Authentication), Node JS
- **Databases:** MySQL
- **Tools & Platforms:** Git, GitHub Actions (CI/CD), Postman, IntelliJ IDEA, Selenium WebDriver, PWA
- **Patterns / Concepts:** Reactive forms, lazy loading, module splitting, interceptors, role-based access control, reusable components, Aadhaar Authentication, Cross-browser compatibility

Professional Experience

Full Stack Developer (Java + Angular) | Redmil Business Mall

May 2024 – Aug 2025

- Developed and maintained **full-stack web applications** using **Java Spring Boot** and **Angular 18**.
- Designed and developed multiple fintech modules including **AEPS, Micro-ATM, Recharge, Bill Payment, and Cash-Out** with secure REST API integration.
- Implemented **role-based access control (RBAC)** for Admin, Agent, and Retailer panels ensuring secure access to financial transactions.
- Integrated Mantra, Morpho biometric, and Micro-ATM devices using **Angular SDKs** for Aadhaar-based authentication — achieved 90% success rate and reduced transaction errors by 40%
- Collaborated with backend teams for **error handling, performance tuning, and secure API design** using Spring Boot best practices.
- Automated data extraction and export using **Java Spring Boot and Selenium WebDriver**, replicating manual workflows through coding and APIs to achieve faster, scalable, and error-free processing.
- Developed a **Paint Protection Film (PPF) Website** with Angular stack.
- Created an advanced **carousel/slider fetching dynamic API data**.
- Developed a **Gaming Website** with profile management, transactions, and authentication.
- Integrated **RxJS for efficient data handling and API communication**.

Angular Developer | Redmil Business Mall

Apr 2022 – Apr 2024

- Developed and optimized **Angular applications** for financial services.
- Implemented **role-based authentication** and **dynamic dashboards**.
- Solved **UI/UX and API synchronization issues** in HDFC Loan CRM, improving agent productivity and reducing lead processing time.
- Designed interactive UI components for real-time financial data visualization

Education

Bachelor of Computer Applications (BCA)

Avviare Educational Hub, Noida (2019 – 2021)

Certifications & Achievements

- Java Full Stack
- Web Designing with MySQL course
- Selenium WebDriver with Java

Projects & Source

Satendracoder Developer Suite (Open Source Project)

- Developed a full-stack platform combining 10+ developer utilities (**JSON Formatter, Base64 Encoder, QR Generator**, etc.), along with blogging, learning modules. Built using **Angular, Java Spring Boot, JWT** authentication, and **MySQL**. Project is open-source and live on [GitHub](#).
- **Tech:** *Angular, Spring Boot, JWT, MySQL, Docker*

Redmil Fintech Platform (Banking & Payments)

- Developed and deployed a full-featured fintech web application supporting **AEPS, Recharge, Bill Payments, Wallet Transactions, and Micro-ATM** services. Implemented secure **login, authentication & authorization**, transaction dashboards, and API integrations for payments. Designed UI/UX and consumed APIs for multiple financial services modules independently.
- **Tech-** Angular, Angular Material, REST APIs, JWT, RxJS

Redmil Backend Automation (Spring Boot APIs)

- Created Spring Boot APIs for **scraping, automation, and testing** of fintech services. Designed backend automation workflows and integrated APIs for validation & QA purposes
- **Tech:** - Java Spring Boot, MySQL, Selenium, REST APIs

Redmil Website (HDFC Loan CRM)

- Built an Angular-based CRM for customer onboarding, loan application workflows, and approval process with secure API integration.
- **Tech:** - Angular, Angular Material, REST APIs, JWT, RxJS, GitHub, Postman

Redmil Website Gaming

- Built an Js-based gaming platform with profile management, transactions, authentication, and dynamic carousel using JavaScript for efficient data handling.
- **Tech:** - HTML, CSS, JavaScript, Web design

Redmil Website PPF (Paint Protection Film)

- Developed a dynamic Angular website for paint protection film services including car listings, product management, blogs, and admin dashboard.
- **Tech:** - Angular, Angular Material, REST APIs, JWT, RxJS, GitHub, Postman

Open-Source Contribution

SC-Angular-Generator (VS Code Extension)

- Published a VS Code extension for Angular developers to simplify development workflows.

SC Angular Loader

- A lightweight Angular loader package with spinners, dots, bars, skeletons. Fully customizable and works with standalone components

SC Angular Toastify

- A simple, lightweight toast notification library for Angular standalone project
